A BACHELOR'S IN CRIMINAL JUSTICE

The criminal justice system is an institution that is at the crux of societal concerns. When individuals are asked to define major social problems, the fear of and response to crime are found at the top of the list. People not only want to have a better understanding of these problems; many also want to become a part of the solution.

The bachelor's degree in criminal justice program provides a platform for you to learn about the legal and correctional systems in the country, the philosophy of punishment and deterrence of crimes, and ethical codes of behavior. You will learn about interpersonal communication skills, multicultural issues, leadership and management, moral and ethical considerations, and technology.

Some graduates with degrees in criminal justice go on to enjoy careers in law enforcement, court administration, victim services, private security or corrections. Others use a criminal justice degree as a first step toward law school or other graduate programs.

WHY SHOULD I STUDY CRIMINAL JUSTICE?

Are you looking for an exciting yet impactful profession? Have you been searching for a career path that will allow you to leave a positive mark on the world? If so, a degree in criminal justice is your ticket to achieving unique experiences, intellectual stimulation and amazing opportunities.

Criminal justice has a variety of branches you can choose from. Whether you prefer to investigate behind a desk or get out into the field, the possibilities are endless. Jobs in the criminal justice field are stable.

You can work in a variety of settings, including judiciary and law, juvenile justice, customs and border protection, social services, teaching and research, drug enforcement, private and personal security, and corrections.
