Course Description
This course explores major themes in the social, cultural, political, and economic history of the peoples of North America to 1877. Topics include the intersections of cultures in colonial America, the origin and development of the American republic, the evolution of democratic ideas and institutions, western expansion, slavery, sectional conflict, and emancipation and its aftermath.

Through lectures, discussions, and readings, we examine the history of the United States from the colonial encounter through the American Civil War and Reconstruction. We investigate the multicultural nature of the United States, the challenges of growth and expansion, and increasing tensions over American values and identities.
