

Students taking classes in the School of Communication & Media:

The following definitions may help you understand the types of instruction offered this fall semester. Keep in mind that the university may need to pivot at any time, depending on the coronavirus outbreak.

After Thanksgiving, all fall courses will move online for the remainder of the semester, including final exams.

If you have questions, contact your professors or email socm@kennesaw.edu.

Fall Instructional Methods

ON-SITE (in-person/face-2-face)

This is an **On-site** course delivered in a traditional in-person classroom setting at scheduled dates and times.

ROTATIONAL ON-SITE

This is a **Rotational On-site** course delivered in a traditional in-person classroom setting, for a portion of the enrolled students, at scheduled dates and times with the remaining portion of the class participating online. Those students attending in person will be rotated according to a schedule established by the instructor.

TOUCHPOINT ROTATIONAL

This is a **Touchpoint Rotational** course in which the majority of content, assignments, and assessments will be delivered online synchronously or asynchronously. On a certain number of days assigned by the instructor throughout the semester, you will attend class on-site in a traditional in-person classroom setting.

ASYNCHRONOUS ONLINE

This is an **Asynchronous Online** course, which means this is primarily an online course. You are expected to engage with the online course content on a regular basis and meet established deadlines defined in the syllabus or elsewhere in the course. This class may contain optional synchronous sessions, which will be announced by the professor. You are expected to be prepared for online delivery including arranging access to stable internet that can handle the demands of online courses and a computer with (internal or external) functioning webcam with microphone.

SYNCHRONOUS ONLINE

This is a **Synchronous Online** course, with scheduled meeting days and times for your virtual classes. You are expected to be prepared for online delivery including arranging access to stable internet capable of handling streaming video demands and a computer with (internal or external) functioning webcam with microphone.
